

Erratum: “Guiding Communities Affected by PFASs: Tools for Tackling Contaminated Drinking Water”

Nate Seltenrich

Environ Health Perspect 127(2):024003 (2019), <https://doi.org/10.1289/EHP4170>

The sentence “The group’s perspective is grounded in research and outreach completed since 2016 in northeastern states, particularly Rhode Island, but is designed to translate across the county” contains a typographical error. The word “county” should have been “country.”

EHP regrets the error.
